

when it has to be spectacular,  
use **FIREWORKS**

Topic: The Benefits Of Hosting Your Website With Fireworks

## Why Host Your Website With Fireworks?

### Extensive Hosting Capabilities

Fireworks have Linux and Windows hosting servers in Australia, USA, Europe, Asia and Britain. This gives you the opportunity to host your website in the physical location of your target market, therefore ensuring quick download speeds for your end user.

RAM: 1024Mb Guaranteed RAM with 4Gb of Burstable RAM.

STORAGE SPACE: Plans from 250Mb up to 300Gb of space!

PROCESSOR: Intel 8200 - Core2 Quad Core 2.83GHz, Dedicated Server

### 24/7 Monitoring & Backups

Fireworks use third party communications companies to monitor the hosting servers 24 hours a day, 365 days a year. This ensures the maximum uptime of your website and instantly notifies Fireworks of any problems with the hosting. This has resulted in an average uptime of 99.9% from 2004 until now. Server backups are automatic taken on a daily basis to ensure that the website can quickly be restored in the event of a server crash, fire or other potential data threats.

### No Limitations

At Fireworks we are big believers in no limitations. All of our hosting plans come with unlimited monthly bandwidth, unlimited monthly visitors, unlimited databases and unlimited email addresses. The only limitation is the storage space that you choose. This determines the level of hosting plan you are on and is scalable to fit any website size.

### **Email Protection**

All Fireworks hosting plans include *Spam Assassin* email spam filters and *Norton's* anti-virus protection. This protects you from receiving an overwhelming amount of spam or nasty viruses that may penetrate your computer through emails.

### **Scalable Economy**

Fireworks provide various hosting plans to suit the size of your website. As your website grows in size you can increase or decrease the hosting plan to suit. This gives you the flexibility to develop your website in the future whilst ensuring that you are never paying for extra space that you don't need.

### **Human Communication and Service**

We prefer the human touch. Fireworks provide friendly, personalized assistance on all your hosting requirements. We provide personal support with your emails and website. We also manage your hosting and your domain registration. Unlike many other hosting companies that solely rely on automated bulk communication, Fireworks will not let your hosting or domain registration expire or go offline without personally confirming this with you first.

### **Your Personal Control Panel**

Fireworks provide you with access to your own hosting control panel where you can manage emails, FTP and many more hosting options. The control panel is quick and easy to use. You can log into your control panel here:

[www.fireworkswebsites.com.au/control.php](http://www.fireworkswebsites.com.au/control.php)

### **Full Responsibility**

An advantage of hosting your website with Fireworks is that we are able to fix technical problems. When there is a problem with a website it is common for the hosting company to point the finger at the website developers and visa versa, thereby achieving no clear resolution. Hosting with Fireworks will provide one point of contact for any technical issues or updates. Fireworks host and develop websites, providing us with the ability to fix any issues regardless of whether they are caused by the hosting or related to the programming of the website.

### **Industry Experience**

Fireworks is not just a hosting company. Since 2003 we have been providing website hosting, online marketing, website development, SEO, programming and other website services. Our experience in the industry and wide knowledge on everything web related equips us with additional skills to problem solve issues relating to your websites, emails and databases that other website hosting companies may not be able to fix.

### **Established Office**

Fireworks began in 2003 and has an established office at 37 Pontiac Cct, Warner Lakes QLD 4500. This gives you the peace of mind of knowing where and how we work and be assured that we are taking the best possible care of your business.

### **No Hidden Fees**

Unlike many website hosting companies that charge excess-usage fees or additional management fees, Fireworks fees are straight forward and simple. You are never charged for over usage.
